PROFILE

Hey it's wahab here , I 'm highly reliable and efficient student , positioned strongly to contribute in the field of Software engineering and Artificial intelligence.

I have done several projects on AI as a freelancer. And have experience in problem solving through AI.

I have coached and trained my colleagues & friends over technologies, methodologies, latest trends, and work life balance. I am active on most social media sites and I have people from every background in my network.
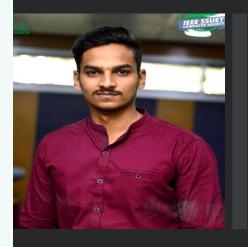

Currently looking for a nice job opportunity with good working environment where I can further enhance my skills and also learn some new.

PROJECTS

- Face recognition using siamese network

- Object detection using Yolo architecture

- Emotion recognition using vgg 19 architecture

- Monkey breed classifier

- Digits recreation using general adversarial network

- Face aging using general adversarial network

- E-marketing Website (Semester project)

- Banking management system in C (semester project)

- snake game Java (semester project)

- stock prediction using regression techniques

CERTIFICATIONS

- Certificate in information technology,Computer Collegiate

- Deep learning and neural networks , Coursera

- Convolution neural network , Coursera

- Diploma in Artificial Intelligence, PIAIC

- Bootstrap , Coursera

- Introduction to deep learning, Nvidia

- The raspberry pi platform and python programming for raspberry pi , Coursera

- Interfacing with the rapbery pi , Cousera
