PROFILE

Hey it's wahab here , I 'm highly reliable and efficient student , positioned strongly to contribute in the field of Software engineering and Artificial intelligence.

I have done several projects on AI and android as a freelancer. And have experience in problem solving through AI.

I have coached and trained my colleagues & friends over technologies, methodologies, latest trends, and work life balance. I am active on most social media sites and I have people from every background in my network.

Currently looking for a nice job opportunity with good working environment where I can further enhance my skills and also learn some new.

PROJECTS

- Face recognition using siamese network
- Symptom recognition AI web application.
- Emotion recognition using vgg 19 architecture
- Monkey breed classifier
- Digits recreation using general adversarial network
- Face aging using general adversarial network
- E-marketing Website (Semester project)
- E-commerce android application (flutter)
- Human tracking IOT device.
- stock prediction using regression techniques

CERTIFICATIONS

- Certificate in information technology,Computer Collegiate
- Deep learning and neural networks , Coursera
- Convolution neural network , Coursera
- Diploma in Artificial Intelligence, PIAIC
- Flutter Advanced , Udemy
- Introduction to deep learning, Nvidia
- The Raspberry pi platform and python Programming for Raspberry pi , Coursera
- Interfacing with the Rapbery pi , Cousera
